**“Garmin – inReach SE+ Handheld Satellite Communicator”**

**GARMIN**

**inReach SE®+**  
 Satellite Communicator

The inReach SE+ with Global Iridium satellite coverage is the perfect choice for workers that travel outside of cellular coverage areas or internationally. Complete with 2-way text messaging and SOS panic button, the SE+ can be configured by LWSS to report to any API aggregated mapping portal for seamless integration into select smart phone check-in application solutions.

With affordable and flexible rate plans the SE+ is a great choice to incorporate into your company’s Lone Worker program.

**FEATURES**

- High Sensitivity GPS for reliable location and tracking.
- Programmable tracking intervals.
- Superior Global Satellite and GPS performance
- 100 hour standby.
- 2 way text message communication with SOS.

**KEY USE CASES**

- Users that work outside of Cellular coverage areas.
- Driver behavior management.
- Companies who require real time updates from employees.
- Workers that travel internationally.
- Backcountry and outdoor enthusiasts.
